

## RFQ No. 19H08020Q0022 - Purchase and Installation of Office Furniture

### Questions & Answers

- 1) In items 3 and 4, you request panels made of acoustic material. (The best material that provides the greatest sound absorption is fabric), but considering the cleaning reasons, the material that is smooth in texture is better. In this case, can we offer Melanin or Formica laminate Panels?  
**A.** Could be Melanin - See Amendment #001
- 2) As you know, in all modular stations a wiring duct is not requested. Can we offer a gutter system below the surfaces that allows to pass electrical cables through the station?  
**A.** Yes, gutters to facilitate wiring. - See Amendment #001
- 3) Could you please extend the delivery time from 30 calendar days to 60 calendar days?  
**A.** Yes - See Amendment #001
- 4) Could you please inform us for how long do you need the quality guarantee in all the furniture requested?  
**A.** One Year minimum
- 5) Will the power supply for the work stations come by the floor or the roof?  
**A.** Through the roof and going down the walls
- 6) Can the delivery time be extended? Our furniture takes 14 weeks in shipping.  
**A.** The area has to be furnished by the end of September
- 7) Is it possible to have the Auto cad version of the blueprint? If not, a PDF with the exact measures. The blueprint provided is a scanned document and we cannot work with it.  
**A.** See attached PDF format.
- 8) I have a doubt regarding the quantities on the station panels:

BACK STATION PANELS WHICH CONSIST OF PARTITIONS THAT HELP REDUCE NOISE AND CREATE PRIVACY 0.025 M THICK X 1.22M LONG X 1.20M HEIGHT	34	ea
SIDE STATION PANELS WHICH CONSIST OF PARTITIONS THAT HELP REDUCE NOISE AND CREATE PRIVACY 0.025 M THICK X 0.50M LONG X 1.20M HEIGHT	68	ea

If we provide these quantities on plain, given this is a modular system, we can use the same panel for the detached work stations in a way that if we optimize the modular system, we would only need:

22 panel units of 120x120

51 panel units of 50x120

Understanding that the "L-shaped" stations do not need panels nor the desks

- A. If the station will be constructed as a modular system that can use the same panel for detached work stations, then use the 22 panel units of 120 x 120 and the 51 panel units of 50 x 120, and always having into consideration that the "L-shaped" stations do not need panels for the desks requested.
